

# Two-seated Car

## using modern parts

(Minifigs not included)

Ever wondered why all the LEGO® cars have only one seat? What car would a Minifig couple require?

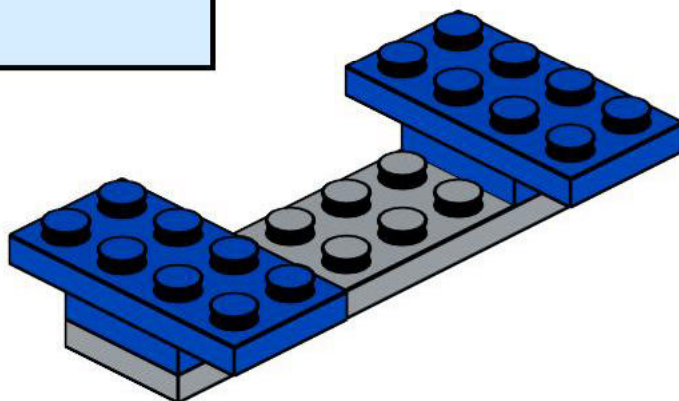

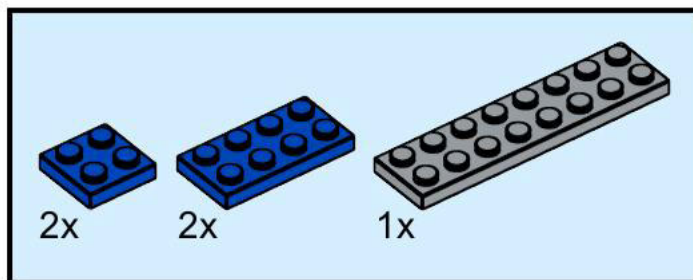

**This two seated car meets the needs of a Minifig couple!**

Since I was short on car chassis plates and other modern car stuff when I created it, I found a way to make it with very basic parts, including vintage car parts. Enjoy!

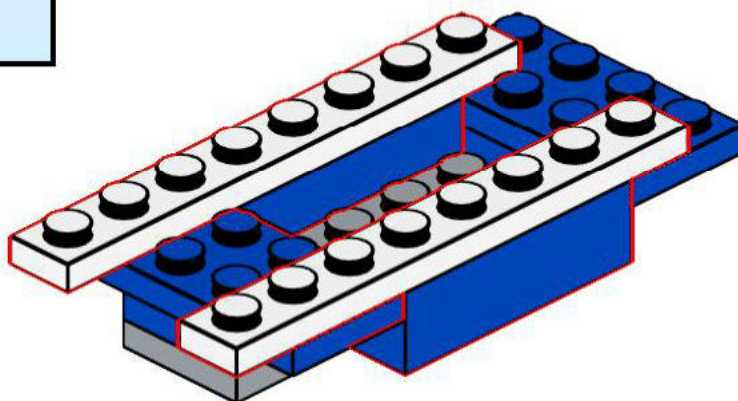

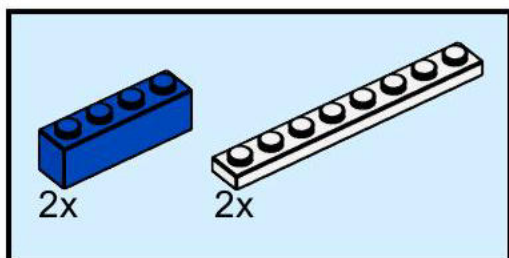

The car works also if you have only vintage parts. The car works also if you have no radiator grille at all.
